QUESTIONS FOR ORAL ANSWER

SEWAGE FACILITIES AND DUMPING SITES IN
THE NATA-GWETA CONSTITUENCY

MR P. MAJAGA (NATA-GWETA): asked the Minister of Land Management, Water and Sanitation Services if he is aware of the deplorable state of sewage facilities and dumping sites in the Nata-Gweta Constituency; he should further state:

- (i) the impact of poor sanitation facilities on the environment, livestock and people; and
- (ii) the actions with timelines to remedy this situation.

MINISTER OF LAND MANAGEMENT, WATER AND SANITATION SERVICES (MR MZWINILA): Good afternoon Mr Speaker.

- (i) Mr Speaker, my ministry is aware of the state of the sewerage facilities in Nata-Gweta Constituency. The sewerage facilities operated by Water Utilities Corporation (WUC) in Nata-Gweta Constituency are Sowa Township sewage ponds and Gweta sewage ponds. Both facilities are operating to the required standard, however the security fence for the two sewerage facilities has been vandalised by elephants, making it easy for cattle and wild animals to access the facilities therefore negatively impacting on environment, cattle and ultimately on people.

Disposal of sewage in the Nata-Gweta Constituency varies from village to village depending on the infrastructure development in an area, with most villages utilising WUC vacuum tanker services while in Sowa Township plots are connected to the sewerage pipeline. Some villages dispose the sewage at Gweta sewage ponds while other villages, the sewage is taken to Tutume Sewerage ponds using the vacuum tankers. One vacuum tanker is available to service Nata-Gweta Constituency and in cases of high volume of request, a second one is often taken from either Tutume or Masunga Service Centre to alleviate the situation.

- (ii) WUC considered installation of elephant spikes to deter elephants from the facilities. The installation of a new security fence together with elephant spikes at the wastewater ponds was planned for financial year 2021/22, however, procurement for elephant spikes at both Sowa and Gweta ponds stalled because the budgeted funds were too low compared to financial bids submitted by service providers. WUC will consider implementing the project during the 2022/23 financial year subject to approval of the budgets by the board. I thank you Mr Speaker.

- (iv) names of all individuals, strategic partners and companies that have assisted in the Vaccine rollout, logistics, distribution and procurement.

ASSISTANT MINISTER OF HEALTH AND WELLNESS (MR LELATISITSWE): *Ke a leboga*

Mr Speaker. The pandemic has a tremendous strain on Botswana's main resources of revenue, and the country's ability to sustain the high levels of expenditure on the pandemic was challenged. It is in this light that the Government of Botswana sought strategic partners within the economy to finance procurement, as well as the rollout of COVID-19 vaccine.

Mr Speaker, this is the opportune moment to pay tribute to all individuals and companies who heeded to the call by His Excellency the President Dr Mokgweetsi Eric Keabetswe Masisi, for the support on Government's effort to respond to COVID-19 pandemic. Indeed Botswana and different organisations responded positively, and came forward to complement our noble effort.

Mr Speaker, the COVID-19 Vaccine Committee was established in January 2021. The Committee was mandated to develop a national implementation strategy on COVID-19 vaccine, acquisitions and their deployment and to advice Government on the mutual engagement with any individual or companies that may wish to render support in this process. The Committee Members Mr Speaker, comprised of COVID-19 Coordinating Team, Deputy Coordinating and Acting as the Chairperson, COVID-19 Coordinating Team Scientific Advisor, Director Public Health Services, Deputy Permanent Secretary, Health policy Research and Development, Deputy Secretary for Budget Administration Ministry of Finance and Development Planning, Deputy Permanent Secretary, Multilateral Diplomacy and Policy Analysis, Ministry of International Affairs and Cooperation, Deputy Permanent Secretary

Information and Broadcasting, Office of the President, Deputy Permanent Secretary Governance and Ministry of Local Government and Rural Development. That is the composition of the Committee.

The expected deliverables of the Committee included a plan *kwa* Botswana COVID-19 vaccine deployment with well defined recipients population, established and functional partnership between Government of Botswana and other partners.

Mr Speaker, as outlined above the COVID-19 Vaccine Committee was mandated to develop a national implementation strategy on COVID-19 vaccination, acquisition and their deployment while Botswana Vaccine Institute (BVI) was established to support livestock industry by manufacturing relevant vaccines and providing services to combat livestock diseases.

Mr Speaker, several partners representing public sector, private sector, civil society organisations and the deployment partners assisted in this vaccine rollout logistics, distribution and procurement. I cannot provide names of individuals Mr Speaker, or strategic partners and companies that have assisted with the vaccine rollout logistic distribution and procurement, because all of these partners participated. It is a long list Mr Speaker, that the Honourable Member can be given a copy if he wish so. Thank you Mr Speaker.

GROSS DOMESTIC PRODUCT

MR T. B. LUCAS (BOBONONG): asked the Minister of Investment, Trade and Industry to state:

- (i) the contribution of the manufacturing sector to Gross Domestic Product (GDP) in the following years; 1980, 1990, 2000, 2010 and 2020;
- (ii) the targeted contribution of the sector to the economy in each year;
- (iii) how the performance of the manufacturing sector has affected;
 - (a) the country's import bill;
 - (b) levels of employment;
 - (c) levels of industrialisation; and
- (iv) specific and new steps being undertaken to bolster the growth of the manufacturing sector in general and specifically in rural areas.

ACTING MINISTER OF INVESTMENT, TRADE AND INDUSTRY (MS SERAME): Thank you Mr Speaker, good afternoon. *Ke kopa go se ka ke tshuba* video Mr Speaker.

- (i) Mr Speaker, according to Statistics Botswana and the World Bank reports, the contribution of the manufacturing sector to Gross Domestic Product (GDP) was 4.4 per cent in 1980; 4.9 per cent in 1990; 7.5 per cent in 2000; 8.5 per cent in 2010; and 5.7 per cent in 2020. The average contribution of the manufacturing sector to GDP for the period

1994 to 2020, according to the most recent data series published by Statistics Botswana, was 7.3 per cent.

- (ii) Mr Speaker, even though in the earlier years the ministry did not set targets for the contribution of the manufacturing sector to GDP, in 2019, the ministry set a yearly target of 7 per cent for the period 2019 to 2036.
- (iii) In terms of performance of the manufacturing sector:
 - (a) The manufacturing sector has helped to reduce the import bill. In 2020, imports of manufactured items totaled P41 Billion, while domestic production of manufactured items was just under P10 Billion. Hence the manufacturing sector reduced the import bill as many domestically produced goods would otherwise have been imported.
 - (b) Mr Speaker, according to Statistics Botswana Formal Employment Sector Statistics, the ratio of employment for the manufacturing sector to total formal employment was 6.7 per cent in 1980, 8.5 per cent in 1990, 11.2 per cent in 2000, and 10.2 per cent in 2010. In 2020, manufacturing accounted for 7.7 per cent of formal employment according to the new Quarterly Multi-topic Household Survey, which uses a different methodology to the old formal employment survey and hence the results are not directly comparable. Nevertheless, these results show that manufacturing is relatively labour intensive, and accounts for a larger share of employment than of GDP.
 - (c) Mr Speaker, the Industrial Development Policy of 2014 broadly defines industrialisation to include manufacturing and services. While in proportional terms the contribution of the manufacturing sector to GDP has remained constant over time, in absolute terms, the manufacturing sector has been growing.

Over the period 1994, to 2020, manufacturing grew in real terms by 4 per cent a year on average, compared to 3.5 per cent a year for GDP as a whole.

- (iv) Mr Speaker, finally Government has undertaken the following steps to bolster growth of the sector:
 - (1) Prioritized value chain development to unlock opportunities to promote citizen economic

empowerment. The initial sectors of focus include minerals, tourism, food and education; and this also includes funding of enterprises in the prioritised sectors.

- (2) Development of Special Economic Zones (SEZ) such as the Pandamatenga focusing on agricultural production including agro-processing;
- (3) Imposition of import restrictions for commodities such as bottled water, salt, baked goods and school uniform which has resulted in increased production of these products within the country;
- (4) Through the Botswana Investment and Trade Centre (BITC), attracting Foreign Direct Investment (FDI) into export-oriented manufacturing;
- (5) In addition, for the rural areas, the Local Economic Development (LED) Programme is being implemented by the Ministry of Local Government and Rural Development specifically targeting the growth of industries in the rural areas. I thank you Mr Speaker.

MR LUCAS: *Supplementary Mr Speaker.* Ke a leboga Tona.
