*Mr Speaker*, livestock theft is an issue of concern in Botswana, and the Government is doing all in its powers to curb. Various mitigation strategies continue to be implemented. Livestock is fundamental to the livelihood of Batswana. It is seen as a source of income, wealth and status. The Setswana adage *ke se nopolu sa re, "ka e rua ka tlhoka boroko, ka e tlhoka le gone ka bo tlhoka,"* fully captures the importance of livestock to the average Motswana.

- (i) I confirm that cross border livestock theft in Botswana, particularly the Kgalagadi, Goodhope-Mabule, Tutume Sub-District and Ramotswa is a challenge. Kgaleng area has not yet experienced cross border livestock theft unlike other areas. On the other hand, stock theft cases were recorded in Ghanzi and North East areas during the year 2021. The total number of livestock stolen are indicated by the table. Let me just go straight to the table *Mr Speaker*.

(ii) Mr Speaker, there are several security and diplomatic interventions that have so far been mobilized to deal with the problem of cross border livestock theft. These include the following;

- Formation of anti-stock smuggling teams patrolling around the areas.
- Engagement of the community through the Farmers Anti-Stock-theft Committee, to assist in the fight against stock-theft.
- Collaboration with other stakeholders in the fight against cross-border crime, to further enhance the Botswana Police Service personnel deployed along the affected areas of the boundary (joint patrols).
- Implementation of the resolutions reached at several fora such as the Joint Permanent Commission (JPC), quarterly bilateral meetings, BI-National Commission, the one that will be sitting in a week's time.
- The formation of a fully-fledged Anti-Stock Theft Branch within law enforcement.
- Mr Speaker, it is our view that these interventions yield positive results as they enhance information sharing and intelligence-led operations/investigations which results in interceptions or recovery of some stolen stock and reduction of stock theft cases.

(iii) Mr Speaker, I am aware of the digital solutions offered by Information Technology (IT) companies that could be used to monitor herds/livestock. This is an area that we are exploring as Government, as we continue to digitise our systems in line with the RESET Agenda as the Honourable Member rightly stated in his question. Farmers are encouraged to utilise technology to increase security of their livestock.

The use of licensed drones, ear tagging, setting up geo fences, some of the technologies that we are exploring, have in some countries proven to be of great help to farmers in that geo fences assist in defined digital parameters and once such are breached, alarms/signals are sent to farmers to warn them of a potential breach that could pose danger to their animals or livestock.

(iv) Mr Speaker, the farmers, whose cattle has been stolen and found in neighbouring countries are assisted in several ways;

- Transport and other logistics at Government cost to identify their livestock.
  - Following identification, farmers are assisted with importation processes for such livestock in a situation where there is no disease outbreak.
  - Where there is a disease outbreak, farmers are compensated following destruction of their stock.
  - In countries where importation of livestock is prohibited, farmers are accompanied by police officers for auction sales, proceeds of which they are entitled to.
- (v) Mr Speaker, combating cross border crime including Stock Theft has always been Government priority. This is demonstrated by the various strategies as stated in part (ii) of this response. These national strategies and protocols are continuously reviewed as and when necessary to improve efforts to mitigate cross border theft.

Over and above the current strategies in place, the BI-National Commissions form a part of a bigger strategy that Government uses to combat cross border rustling. Mr Speaker, that is the response.

**MINISTER OF LAND MANAGEMENT, WATER AND SANITATION SERVICES (MR MZWINILA):**

I thank you Honourable Speaker. I would like to first of all in my contribution, show my support to the Honourable Minister and her 2022/23 budget.

Mr Speaker, the 2022/23 Budget Speech by Honourable Peggy Serame showed that the devastating effects of COVID-19 pandemic on our economy has slowed down our progress towards the achievement of the objectives set out in Vision 2036. Nevertheless, the Budget Speech also highlighted a number of strategies that will be implemented to ensure that despite the lost time, the country will still be able to attain the objectives of Vision 2036.

Mr Speaker, the Budget Speech was special in the sense that for the first time, it was presented by an Honourable female Finance Minister, the first time this has happened since we have attained independence. This is an important step towards achieving gender equality in our social, economic and political spheres. As already highlighted by Honourable Serame in her speech, this should inspire women and young girls to have the courage to take leadership positions and contribute to the socio-economic development of Botswana.

Mr Speaker, the Budget Speech comes at a time when the country enters into the final year of NDP 11. Economic progress during NDP 11 was mainly retarded by the emergence of the COVID-19 pandemic. However, the success of the country's vaccination programme is expected to see high positive economic growth, which should be reflective in the 2021 period and the projections for 2022. The rebound and growth is going to also help reduce unemployment, which rose in the past two years of the pandemic as the economic activities slowed down due to the restrictive measures that were needed to contain the spread of the deadly Coronavirus.

Mr Speaker, during NDP 11 our country has been experiencing persistent budget deficit. The Budget Speech rightly emphasises the need to implement structural reforms in order to increase the growth rate, boost job creation, improve productivity and reduce poverty and inequality, as well as leading to economic diversification.

Mr Speaker, in line with tradition of consulting relevant stakeholders, our Government conducted a series of dialogues or Budget Pitsos in a spirit of promoting openness and inclusivity in the formulation of the National Budget. The main findings from the aforementioned consultative meetings included first, the emphasis on the need to refocus public spending on national priorities and needs. It was correctly observed that in the previous years, a large proportion of Government spending goes to the Recurrent Budget while a small portion is allocated to the Development Budget. Most of the Recurrent Budget is channeled towards the payment of wages and salaries, grants and subventions to Local Authorities and state-owned enterprises.

Mr Speaker, as a listening Government, through the Ministry of Finance and Economic Developments, we have decided to implement suggestions from the Budget Pitso and implement the necessary adjustments to Government expenditure, which will entail a switch with the view to achieving a reasonable balance between Recurrent and Development Budget.

The emphasis coming out of the Budget Pitso on the need to continue to save Batswana from the COVID-19 pandemic is commendable. We need to continue to vaccinate and our vaccination efforts and observance of COVID-19 protocols are important so as to contain the spread of the virus. Government has responded to the call

to prioritise the fight against COVID-19 by allocating 18.7 per cent or P10.01 billion of the Recurrent Budget to the Ministry of Health and Wellness with P3.93 billion of the Development Budget earmarked for COVID-19 containment measures.

It is important to also thank Batswana for their resilience and adherence to COVID-19 protocols together with their rapid uptake of vaccines. I wish to encourage all Batswana to continue with this and to take advantage of the booster shoots, which are available local. The same gratitude is also extended to the business community and Botswana's development partners who were very supportive to Government's efforts to combat COVID-19.

Mr Speaker, the six key initiatives which the Budget intends to fund in order to cater for the needs of Batswana focus primarily on these following issues;

- (1) Maintenance of public infrastructure.
- (2) Reserving the budget for CCP to the contractors in the immediate locality of that area,
- (3) On maintaining or increasing the Budget allocation for social welfare programmes, including increasing wages and subventions to social welfare programmes and the amounts that beneficiaries receive,
- (4) Funding the developments of sporting talent,
- (5) Allocating additional resources to support the digital transition and
- (6) Allowing or cushioning for the Budget deficits.

Among other things these initiatives will stimulates economies of local communities, create employment opportunities and cushion the vulnerable members of the society from poverty. Notably, the reserving of most of the maintenance projects for citizen-owned companies supports the Citizen Economic Empowerment (CEE) Policy.

The outstanding performance of our athletes or the country's athletes team at last year's Olympic games shows that the country has abundance of sporting of talent which needs Government support. Therefore, the channelling of funds to the development of sports is a timely call and it will help curb youth unemployment. Moreover, sport has the ability to unify the country as observed last year when the country united to offer moral support to the country's Olympics team.

Delisting on the grey listing of Botswana by the Financial Action Taskforce (FATF) in October of 2021 and the expected removal of Botswana from the European Union (EU) blacklists are very important for Botswana because they will improve the ease of doing business in the country, thereby increasing the desirability of the country as a destination of choice for Foreign Direct Investment (FDI). An increase in the flow of FDI will compliment Government's efforts to create employment and stimulate growth. This will create the multiplier effect in the sense that FDI will lead to other sectors of the economy also being empowered and will also lead to economic diversification.

Mr Speaker, the key sets or the national priorities and strategic objectives that were outline in the Mid-Term Review of NDP 11 included the ERTP and was complemented by the RESET Agenda. The proposed Budget is premised on four key strategic priorities namely; saving Batswana from the COVID-19 pandemic, infrastructure development, social welfare and service delivery reforms.

With respect to saving Batswana from COVID-19, the work being done by the Ministry of Health and Wellness through the national deployment and vaccination plan with respect to the roll out of the vaccine should be praised. The goal to vaccinate 80 per cent of the eligible population by the end of the first quarter of 2022 is on track and Botswana currently has the highest vaccination rate in Sub-Saharan Africa. These achievements are key to the country's economic recovery especially through the resurgence of the tourism and hospitality industry. A revived tourism industry will create jobs and help lessen the burden of unemployment especially among the youth.

Mr Speaker, the establishment of a vaccine manufacturing plant in Botswana is a proactive move towards combating COVID-19 and will build a country's capacity to fight pandemics through speedy production and availing of necessary vaccines. It would also aid in the realisation of a knowledge-based economy. Moreover, considering that we seek to diversify our revenue base, export of vaccines will offer the country an important source of revenue to further drive towards the achievements of the nation's aspirations as espoused in Vision 2036, especially the transition from upper middle income to high-income status.

Mr Speaker, infrastructure development forms the foundation for economic growth and human development in any country. I am pleased to learn that in

the upcoming financial year, the Development Budget has been increased by 12 per cent from the previous financial year's Budget. Intended investments in solar power generation bode well with Pillar 1 of Vision 2036 on environment sustainability considering that solar power is renewable. Moreover, this allows us to take advantage of our prevailing weather conditions where the sun is available throughout the year. These investments will reduce the cost of electricity in the country and further support growth. Furthermore, the engagements of independent power producers in power generation will increase efficiencies and further lower electricity cost. This will benefit both household and business consumers of electricity.

In terms of infrastructure development, I wish that going forward in the next Budgets, we can see at least 25 per cent of the total Budget being reserved for the Development Budget. As you know, Budget is divided into the Recurrent and Development. A cornerstone of aggressive economic development is a higher proportion of the Budget being retained for the Development Budget. This creates an enabling environment for job creation. It creates an enabling environment for economic diversification, economic growth coupled with human development. Land management is one of the sectors which are heavily involved in infrastructure development as a land parcel or plot is a basic, fundamental, preliminary or primary infrastructure that is necessary for economic growth and economic diversification.

We have been having challenges in terms of provision of plots, predominantly residential plots and one of the reasons is that land is a finite a resource and we have to be careful in the way and manner in which we allocate plots. We have to be mindful that we allocate plots for the present generation but we are holding land in trusts for future generations. Thus in our attitude of posture towards land management, you always have to understand that we are holding land in trusts for future generations and we are unable to continue with unsustainable provision of plots. We do admit and understand that there have been delays in plot allocation and we are doing a number of things or embarking on number initiatives to ensure that within the next 12 months, we can cater for allocation of at least 100, 000 residential plots.

The challenges of land allocation have been due to the various factors in terms of the role of each factor in land allocation. The first issue with land allocation or

challenge has been land acquisition. Most settlements, villages, towns and cities... in order for the city, town or village to expand, we have to expand into land that is already allocated. It is rare to find land outside settlements which has not been allocated. So, we have to acquire land from those who already have been allocated it and predominantly is *masimo* or ploughing field holders. Now we offer them rates, which we can afford as Government, which we have assessed, the survey has been fair, but usually in the order of increases of 10 fold or even 20 fold, we are short in what the land owners require as adequate compensation. Thus we have to enter into lengthy negotiations with land owners in terms of how we can acquire their land. The laws thus provide for us to compulsory acquire that land but as a compassionate and caring Government, we usually avoid going to the extent of compulsory acquisition but we do try to be as accommodating as we can.

**HONOURABLE MEMBER:** Clarification.

**MR MZWINILA:** I agree.

**MR SPEAKER:** Yes clarification.

**MR MAJAGA:** Point of clarification. Thank you Mr Speaker and thank you Honourable Minister. This issue of compensation looking at the value of *masimo a batho* and other associated land which they own has been going on for some time. Can you not make it a point that you put up a price which will be more or less the same with private sector and the freehold? Meaning to say that there would not be exactly the same but at least you put something because it seems as *bo* Mogoditshane area and other villages expansion, we are caught by people now not letting their fields and other places to the Government because of the low prices but we have been talking about this issue for some years now. Are you doing something as a ministry?

**MR SPEAKER:** Honourable Minister.

**MR MZWINILA:** I thank you Honourable Member. We are doing something about that. We want to put parity, equity or equitability in terms of the value of land in tribal land and freehold land. We want the value paid for both land regiments to be the same. There are three land regiments; tribal land, state land and freehold land. We are moving towards the finalisation of parity in terms of what you pay for on each of the land regiments but that has corresponding effects on the amount of money we would require to compensate people because the primary source of the waiting list is in the peri-urban

areas around Gaborone and Francistown. So, those are what are termed as tribal land areas. So, we want to ensure that we move towards parity in terms of how we compensate people. Correspondingly, we are going to require more funds and I am under the impression that this Honourable House will agree when we do ask for more funds to ensure that we are able to acquire land at market rates and this will reduce the delay in terms of the acquisition of land. Another delay in terms of...

**HONOURABLE MEMBER:** Further clarification Minister.

**MR MZWINILA:** I agree.

**DR TSHABANG:** Point of clarification. Through you Mr Speaker. Thank you Honourable Minister. *Kgang yone ya* acquisition of land from individuals, *go na le kgang ya gore* you have booked some pieces of land *mo metseng* and *beng ba* those pieces of land *ba emetse lona*, *ba dumetse gore ba le rekisetse*, *mme* you are not moving ahead to actually pay and take the land. So, *ba ntse fela* for six or seven years *ba le emetse ba sa itse gore* are they going to finally get the payment *ba golole* the land, *le didimetse fela* and some of those instances *ga re itse gore...* how do react to that Minister? Thank you.

**MR MZWINILA:** Ke a leboga motlotlegi. Ke tsaya gore go ntse jalo, go na le maphata a a ntseng a na le bothata kana kgwetho ya madi. Another delay in terms of provision of residential plots has been the technical expertise we require for base maps. The first step of creating plots, whether the serviced or un-serviced plots, is to do what is known as a base map. To do a base map, we need technical expertise or technical officers. We have been having a shortage of technical officers and what we are going to do as a ministry, we are going to ensure that we rationalise our

positions to ensure that we get more technical officers. We are going to transfer technical officers from areas of low activity to areas of higher activity like the peri-urban areas. That is where the waiting lists are mostly concentrated. For example, we find areas like Mogoditshane having a waiting list of 100, 000 etcetera, etcetera. So, we are going to rationalise our resources and take them where they are required. That is another step.

Another issue which has been delaying in terms of provision of this necessary infrastructure has been layout plans. After the base map is done, the next thing you have to do is a layout plan. Layout plan is done by physical planners. We need greater coordination between us and the Ministry of Local Government and Rural Development. We meet regularly. We have agreed with the Ministry of Local Government and Rural Development that we are going to coordinate this better. We have taken steps, we have done procedures and guidelines of how we are going to ensure that the available resources, the available quantum of physical planners is appropriately used and utilised to ensure that layout plans come out faster.

Also, related to layout plans is in terms of our national development plans, in terms of regional development plans and locality development plans. We are also going to fast-track those in the ministry to ensure that we carry out those processes expeditiously. Another delay in terms of plot allocation has been our strategic environmental assessments or the issue of strategic environmental assessments. We are in discussions with the responsible ministry and we have agreed with them that we are going to see how we can fast-track these sewers and we are going to see where they can be waived. For example, in villages which are not that large in area and where we think that the sewer may not be that necessary, we are going to ask for exemptions and that will also fast-track the process. We will also require to do geotechnical investigations and for that it will require a budget and that is why I am saying that we are looking towards the greater allocation we have been given in the next financial year, to empower us to do all of these things. What we are committed to do is to ensure that we do allocate as many plots as we can within the next financial year to reduce the waiting list significantly.

We are also looking at land board efficiency. Land boards can be more efficient and they need to be more efficient. I have talked to the land boards and I am going

to continue talking to them. I am going to instruct them that they need to be more efficient. I am going to ensure that I meet them personally and regularly on a monthly basis, all of them and ensure that they do things more effectively and efficiently. The amount of time they meet must be efficient. If they require more time to meet, they must justify why they require more time to meet. We do not have a problem in doubling the amount of time they require to meet, as long as they can justify what they need to do or what they are doing in that time. I need to understand why some land boards the last time they allocated plots was 2010 or 2012. That needs to be understood and they need to be held to account for that and need to show cause why they should not be declared as being incompetent. Where we are at right now in terms of our commitment and assertiveness in addressing these delays in plot allocation, we are at the point that we are going to be very decisive, because the Honourable Members have communicated. We do listen, we are very attentive to Honourable Members' comments and we are going to be very decisive in how we address this issue of delays in plot allocation. We are going to ensure that...

**HONOURABLE MEMBER:** Clarification.

**MR MZWINILA:** ...as I said, I have already informed them or I am meeting them every month. Every month I am going to require reports. Those which are not performing, they will have to show cause as to why they should be...

**HONOURABLE MEMBER:** Clarification Honourable Mzwinila.

**MR MZWINILA:** ...and we will need to be very decisive.

**MR SPEAKER:** There is a request for clarification Honourable Mzwinila, from Mathoothe and Kekgonegile.
